

accomplishments, his impact on the lives that he touched, family, friends, students, and colleagues, will be carried in their memories and their hearts for the rest of their days. Floyd will be missed by many, never forgotten, and while his memory might bring a tear, it will certainly bring a smile!

Acknowledgments—I extend a heartfelt thank you to the following people, each contributed

DIADOPHIS PUNCTATUS (Ring-necked Snake). USA: TENNESSEE: McNairy Co.: Mt. Peter (35.289797°N, -88.534467°W; datum WGS84). 31 March 2022. Alexis Larkins, Laura Lloyd, and Brian P. Butterfield. Verified by Jessica Grady. David H. Snyder Museum of Zoology, Austin Peay State University (APSU 20125, color photo). A specimen (APSU 12339) exists for McNairy Co. (Redmond and Scott 2008. Atlas of Reptiles in Tennessee. The Center for Field Biology, Austin Peay State University, Clarksville, Tennessee. Internet version, available at <http://apsu.edu/repatlas/> [updated

in some way to providing information, manuscript review, and overall encouragement: Dr. Joshua Ennen, Jessica T. Grady, Dr. Steven W. Hamilton, John Byrd, Dr. William H. Redmond, Dr. B. Eugene Wofford, and special thanks to Malinda Mabry-Scott and Emily Darnell. Information was also sourced from the APSU Department of Biology and CEFB websites.

18 November 2019]; accessed 31 March 2022). However, this specimen is listed from quad “Purdy, TN” and lacks exact locality data (J. Grady, pers. comm.). Our record is the first vouchered specimen of this species with specific locality data for McNairy County. An individual was found under debris remaining from a removed mobile home located in a rural upland oak-hickory forest. Tennessee Wildlife Resource Agency permit #1419.
